

Did you battle to have a baby? Do you or your friends or family know about the agony of infertility? I am looking for people to share with me their feelings on infertility. Do you believe medical schemes or the patient or the government should be responsible for paying for infertility treatment? The research will be used for my MBA dissertation and will hopefully tell us who you, the consumer thinks should pay for infertility treatment in South Africa. Please fill in the survey at www.infertilitysurvey.co.za or contact me at colleen@infertilitysurvey.co.za or fax your details to 086 612 9470 and I will send you a survey. Your replies will be treated as confidential.

Thank you

Colleen
